

Question	"Le Déjeuner sur l'herbe" Édouard Manet	"Last Judgement" Michelangelo	Video
Subject Matter	The subject matter is a picnic showing controversy.	The subject matter is the final judgement of Christ.	The subject matter is the iPad being unboxed.
Medium	The medium is oil on canvas.	The medium is a fresco painting.	Youtube Video
Elements & Principles of Design	The dark greens of the background forest contrasts with the people, which makes them stand out. The artist mixed genres using landscape and still life (the fruit in the bottom left)	Christ is the center point, and the background is in a sort of spiral. The bright blue in the background creates a contrast from the warmer toned bodies. Also, the form looks 3D.	What caught my attention was the color and texture of the iPad. It was bright pink, shiny, and looked like it had a very smooth feeling.
Year and Place	1863, Paris, France	1535-1541, Sistine Chapel	2024, United States
Social, Political, or Spiritual Ideas	It was a political act against the French Academy because they decided what "good art" was and he wanted to prove that the artist himself should decide that.	The spiritual idea was Christ coming back for the final judgement.	I believe their social ideas are that they want to make content that people will like so that people will follow them in return.
Moral Values Represented	The moral value was truth over idealism, showing that the truth should be shown about life even if it was uncomfortable.	The moral values are that you are in charge of your actions, as we see them getting judged by what they themselves have done.	I believe that because they do content creating, they may value the social attention such as likes and follows, and maybe money.
